

Custom Freezer Floor Repair and Replacement

Our team will custom design and build a new floor into your existing walk in cooler or freezer. We install cove base to meet health department requirements, as well as handle every aspect of the process. When we replace or repair your freezer floor, if necessary, we will also provide a temporary walk in cooler or freezer to store your inventory while we finish the job. Believe it or not, we'll even move all your inventory to and from the temporary cooler or freezer!
