

Labs and Pharmaceutical Vault Doors

Last Updated Tuesday, 28 August 2007

When your lab or pharmaceutical clean room vault doors are in need of replacement, repair, or upgrade, we can recommend many options for you that are far less costly than standard replacement. Our team creates each vault door repair according to your specific needs, health department code standards, and to preserve maximum efficiency.

The most common types of lab or pharmaceutical clean room vault door repair and replacement services we provide are:

- Install new vault and case reach-in glass door systems.
- Replace leaked or broken glass panes.
- Replace door and frame heating elements.
- Replace door closers and door stops.
- Replace door gaskets and retainers.
- Replace shelving and lighting.
