

Hospital Vault Doors

Last Updated Tuesday, 28 August 2007

When your hospital vault doors are in need of replacement, repair, or upgrade, we can recommend many options for you that are far less costly than standard replacement. Our team creates each vault door repair according to your specific needs, health department code standards, and to preserve maximum efficiency.

The most common types of hospital vault door repair and replacement services we provide are:

- Install new vault and case reach-in glass door systems.
- Replace leaked or broken glass panes.
- Replace door and frame heating elements.
- Replace door closers and door stops.
- Replace door gaskets and retainers.
- Replace shelving and lighting.
